## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 6-13, 18 and 20-24 allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant teaches a plurality of commutator segment including at least one ridge to secure the commutator segment relative to the dielectric body.

Terada (U.S. Pat. 2001/0004177) discloses a commutator segment including at least one ridge. However, the cited reference fail to individually disclose, or suggest when combined, a first spaced defined on one side of the adjacent protrusion of the low projection portion, and a second space defined on the other side of the adjacent protrusion of the low projecting portion between the adjacent protrusion of the low projecting portion and the protrusion of the high projecting portion, and at least a portion of the first space and at least a portion of the second space are placed along an imaginary line that is parallel to the projecting direction of the ridge.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically a first spaced defined on one side of the adjacent protrusion of the low projection portion, and a second space defined on the other side of the adjacent protrusion of the low projecting portion between the adjacent protrusion of the low projecting portion and the protrusion of the high projecting portion, and at least a portion of the first space and at least a portion of the second space are placed along an imaginary line that is parallel to the projecting direction of the ridge in combination with the recited structural limitations of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
